# SERVICING NOTE

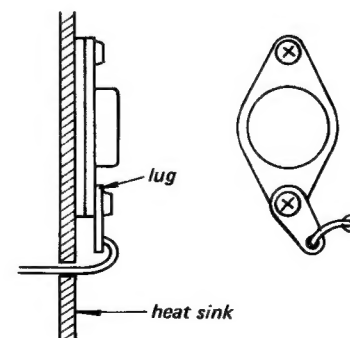

## 1. SERVICING NOTE

When taking the capstan-motor-support bracket off, hold the shafts of the capstan motor and the flywheel. These shafts are supported by this bracket.

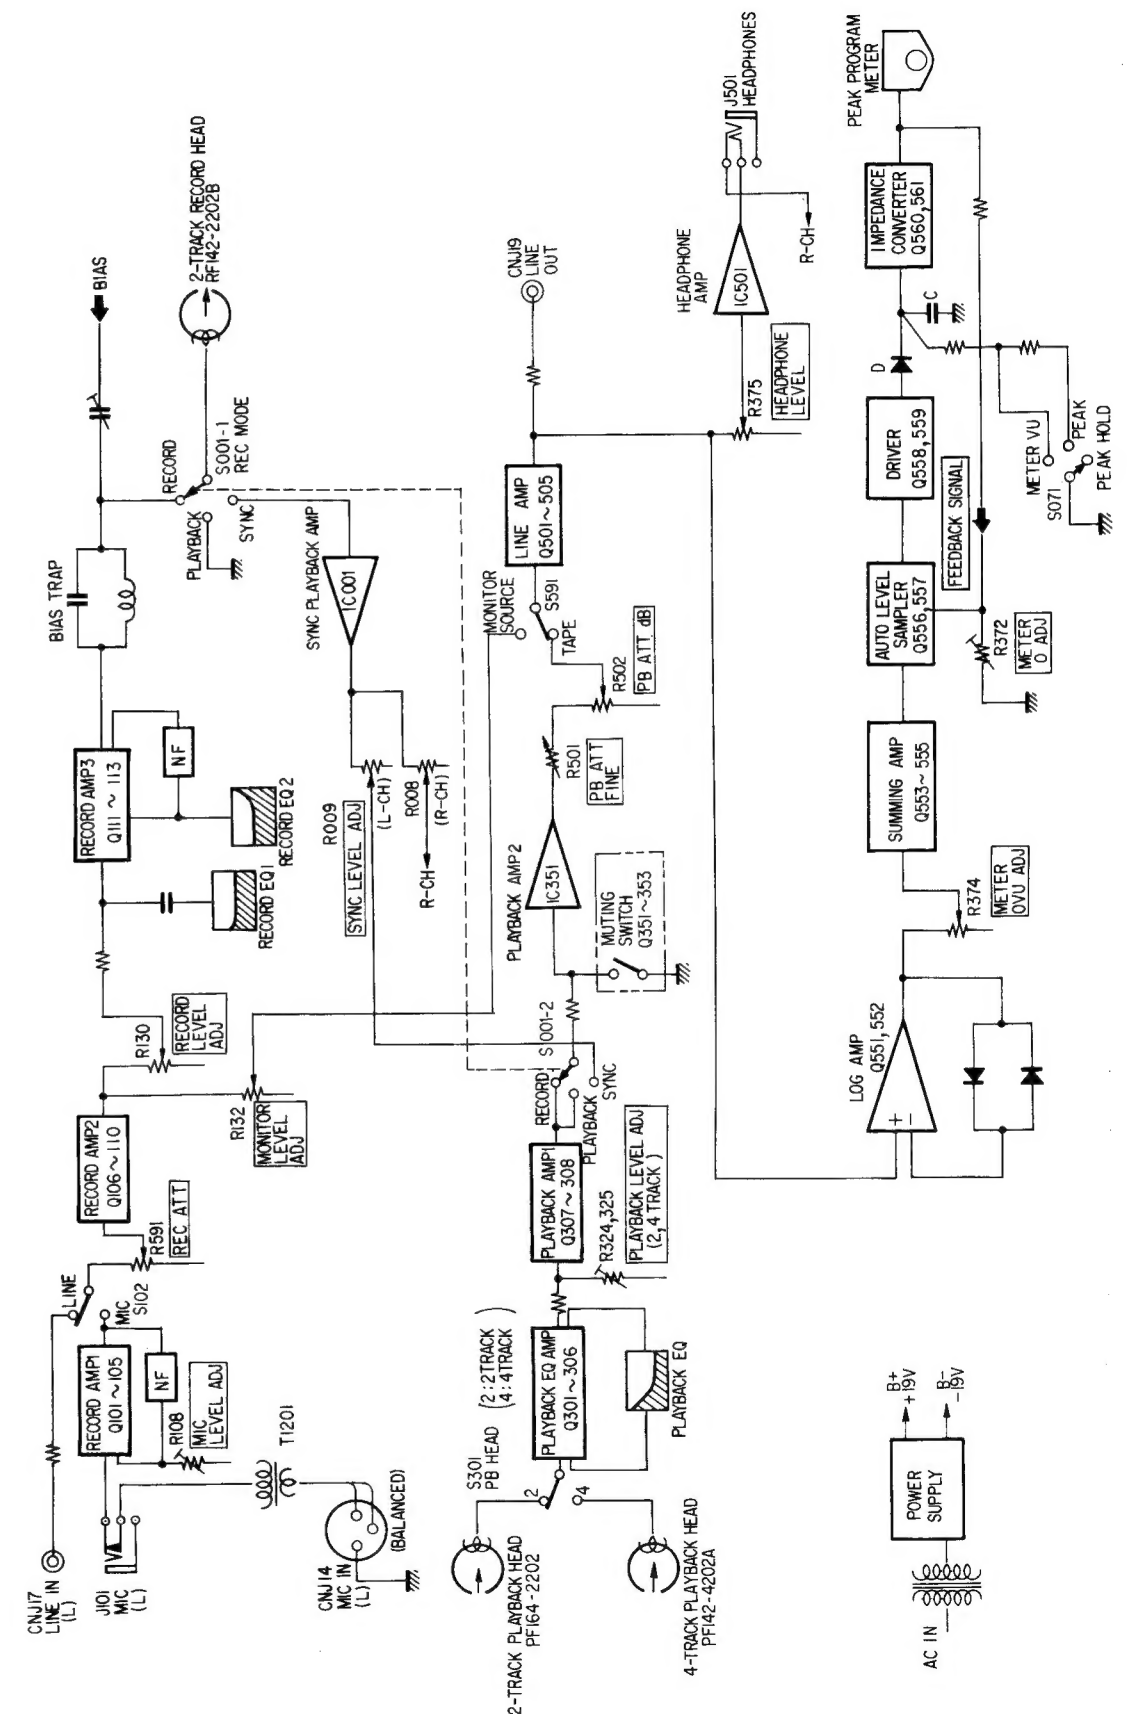

## 2.

When the power transistors Q1201 ~ Q1208 in the rear are exposed, please take precaution that the lugs attached to the collectors do not bend and touch the heat sink especially while serving with the set lying horizontally.
